

Colorado Hospital Association Patient Safety & Quality Department:

Opioid Safety Survey

The Colorado Hospital Association's Patient Safety and Quality Department is seeking your input on the value of launching an opioid safety collaborative. Colorado ranks 4th nationally in probable opioid adverse events. The information you provide will help determine the best course of action to take in order to improve opioid safety in Colorado.

1. Contact Information for Survey Respondent

Organization Name _____

Survey Responder _____

Email Address _____

2. Is your organization actively working on opioid safety?

Yes

No

If yes, what is the focus? _____

3. What are or what do you believe are the top 3 factors contributing to opioid harm events in your organization?

Post-op pain control

Post procedural sedation

Prescribing of opioids

Opioid-associated drug-to-drug interactions

Incomplete event reporting: misses, near misses, events

Other (*please specify*) _____
