

Poll Everywhere – Engage Your Audience in Real Time

How do you engage an audience who has grown up with technology?

Poll Everywhere is a simple application that works well for live audiences using mobile devices like phones. People participate by visiting a fast mobile-friendly web page for your event or by sending text messages. Instructions are displayed on-screen. The poll that is embedded within the presentation or web page will update in real time.

How it works

- Before the meeting, create questions to ask the audience
 - Many question formats are available: multiple choice, open response, live word clouds, clickable images, Q&A, rank order, impromptu questions and more
- During the presentation, the audience is invited to participate in the polling by using a unique web address or by sending a text message to a specific number
 - Audience can participate on cell phone, tablet or computer
 - Audience can answer the questions privately using their electronic device
 - Facilitator controls when the responses are displayed on the computer, or presentation screen if using projection
 - Allows facilitator and audience to see real time poll results
- After the meeting, results reports can be downloaded

How much does it cost?

- Free for up to 25 responses per poll
- Additional plans available
