Monday, Aug. 19
San Luis Valley Health Regional Medical
Center
Alamosa, CO

CHA has a vision for Colorado to be the leader in reducing sepsis mortality. To accomplish this vision, our member hospitals and health systems require tools and resources to educate and train their staff about sepsis. CHA is proud to offer a new **Sepsis Training Suite**. Through a variety of training modalities, members will find resources that are both ready-to-use and customizable, along with materials to help design personalized educational offerings. The training suite includes PowerPoint presentations with slide notes, videos, simulation scenarios, external resources and more.

CHA is offering training sessions for sepsis coordinators and educators to understand the offerings and opportunities with this training suite.

Brenda Tousley, DNP, CNS, ACCNS-AG, AGCNS-BC, CCRN-K, CLNC
Brenda has over 30 years' experience as a bedside nurse in critical care, advanced practice nurse in cardiothoracic surgery program, care coordinator, manager and educator. She is the sepsis lead for Banner Health Northern Colorado. Brenda's DNP capstone project was improving the care of sepsis patients in the emergency department.

Christi Swaim RN, BSN, CCRN
Christi began process improvement for sepsis in her ICU in 2009, and soon expanded to include the bone marrow transplant ICU and emergency departments. She facilitated the multi-disciplinary quality improvement committee to develop a robust facility-wide sepsis program that now drives best practices and mortality reduction for the Denver Metro Area. Christi is the sepsis/quality coordinator for Presbyterian/St. Luke's Hospital and Rocky Mountain Hospital for Children.
