

Resource Ordering Algorithm

The first step to obtain additional resources is by using system partners or by using the Colorado Hospital MOU, where hospitals statewide can exchange resources using the process outlined within the MOU.

Neighboring Hospitals

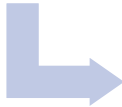

If neighboring hospital resources are exhausted, Healthcare Coalitions should be contacted, utilizing the coalition resource request process. [Link to coalitions contact](#)

Healthcare Coalition

If coalition resources are exhausted, the resource request will be sent to either the local emergency management operations center/ESF#8 ([link](#)) or to the local public health agency ([link](#)).

County Emergency Operations Center

If county resources are exhausted, the resource request will be sent by county emergency management to the state emergency management operations center/ESF#8 to be verified and filled.

State Emergency Operations Center

If state resources are exhausted, the state division of homeland security and emergency management can send the resource request to surrounding states using the EMAC request process ([link](#)).

Emergency Management Assistance Compact

If state resources continue to be exhausted, the state division of homeland security and emergency management can send the resource request to the responding federal agency, depending on the resource request.

Federal Agencies
