## COLORADO HOSPITAL ASSOCIATION DATABANK DATA 2018-2022 Utilization Summary

### Notes and Definitions

---

|                                    |  |
|------------------------------------|--|
| <b>Notes</b>                       | Data is obtained from hospitals submitting information to CHA's DATABANK program and has not been separately audited or validated by CHA. Any data that is blank was not submitted by participating hospital for that year.  |
| <b>Inpatient Discharges</b>        | An inpatient discharge is the formal release of a patient (includes patients admitted and discharged the same day) and the termination of the hospital lodging. For the DATABANK Program, a mother and her newborn baby count as one discharge if they are discharged at the same time. When a baby remains at the hospital beyond the mother's discharge (a.k.a. a "boarder baby"), one discharge is counted when the mother is released, and another discharge is counted when the baby is released. If a patient is discharged from an acute care unit and transferred to another care setting, such as a swing bed, there would be a count for acute discharge and another discharge from swing bed when that occurs. Total discharges include acute care, swing bed, sub-acute/long-term care and distinct-part unit. |
| <b>Inpatient Days</b>              | A patient day is a unit of measure that represents lodging provided and services rendered to inpatients between the census-taking hours (usually at midnight) of two successive days. A patient formally admitted to a hospital who is discharged or dies on the same day is counted as one patient day, regardless of the number of hours the patient occupies a hospital bed. This includes acute care, swing bed, sub-acute/long-term care and distinct-part unit. Newborn patient days are excluded.   |
| <b>Inpatient Surgeries</b>         | The sum of the number of inpatients where a surgical procedure was performed. This count excludes any surgery performed as an outpatient where the patient was discharged the same day the surgery was performed.  |
| <b>Births</b>                      | The sum of the number of live births in the hospital during the reporting period, including cesarean deliveries. Fetal deaths and infants transferred from other facilities are excluded   |
| <b>Emergency Department Visits</b> | The total number of patients seen in an emergency unit who are not later admitted as inpatients.   |
| <b>Total Outpatient Visits</b>     | Total number of outpatient visits reported during the reporting period, including emergency room visits, ambulatory surgery visits, observation visits, home health visits, telehealth visits, vaccinations, and all other visit types.  |
